

Our Mission

The Rajiv Gandhi Foundation is inspired by the vision of a nation that is modern, an economy that is strong and a society that is just. It seeks to strengthen civil society's contribution to the realization of these objectives.

The Foundation is independent of party or political affiliation and offers a forum for dialogue between different views. It works towards influencing public policy, improving governance – local, national and international – and providing enlarged opportunities to the underprivileged and the deprived.

In promoting human development in its diverse aspects, the Foundation gives particular attention to supporting diversity and pluralism in human societies, the empowerment of women and the alleviation of poverty. Acknowledging our obligation to future generations, the Foundation also works for the regeneration of India's environment and the protection of our country's biodiversity.
